IT7053 - Project (Pw)
Semester: 1st

Group No.: 6	
Guided by: Ms. Ayman Shekh	Submitted By:
	Patel Janvi Sanjaybhai (202604102510002) Rathod Riya Girishbhai (202604102510008)

Initial Requirement Document

Title of the project	LearnLoop- AI Powered Credit-Based Learning Platform
Stakeholders involved in capturing requirements	Students, Faculty, Educational Institutions
Techniques used for requirement capturing	Existing E-learning Platform Analysis, Brainstorming Sessions, User Observation
Name of the persons along with designations	
Date	10/08/2026
Version	1.0
Users of the system	Learners, Tutors, Administrators
Consolidated list of initial requirements:	
• User Management 1. The system shall provide secure user registration and login functionality. 2. The system shall support role-based access for Learners, Tutors, and Administrators. 3. Users shall be able to create and manage their personal profiles. • Learning & Collaboration 4. Learners shall be able to access learning modules and educational resources. 5. Learners shall be able to upload and share study materials such as notes, PDFs, presentations, and useful links. 6. Learners shall be able to ask questions and answer queries posted by other learners. 7. Tutors shall be able to create, organize, and manage learning content. 8. Tutors shall moderate discussions and verify shared learning resources.	

- **Credit-Based Learning System**

9. The platform shall implement a **credit-based reward system**.

10. Learners shall earn credits by:

- Completing learning modules
- Attempting quizzes
- Sharing quality learning resources
- Answering community questions
- Helping other learners
- Maintaining learning streaks

11. Learners shall be able to redeem earned credits for unlocking premium learning resources, AI features, certificates, or special activities.

- **Artificial Intelligence Features**

12. The system shall provide an AI-powered learning assistant to answer academic queries.

13. The AI shall recommend personalized learning paths based on user interests, learning history, and performance.

14. The AI shall generate summaries, quizzes, and study suggestions to improve learning outcomes.

- **Assessment & Gamification**

15. Tutors shall be able to create quizzes for learners.

16. Learners shall receive instant quiz evaluation and performance feedback.

17. The system shall maintain learner progress and performance history.

18. The platform shall provide gamification features such as badges, achievements, streaks, and leaderboards to encourage continuous learning.

- **Administration**

19. Administrators shall manage users, Tutors, learning resources, and platform settings.

20. Administrators shall monitor system usage, credit transactions, and user activities through reports and analytics.

21. The system shall maintain activity logs for security and monitoring purposes.

- **General Requirements**

22. The system shall provide notifications for learning activities, achievements, deadlines, and announcements.

23. The system shall provide search and filter functionality for learning resources and discussions.

24. The application shall have a responsive and user-friendly interface compatible

with desktop, tablet, and mobile devices.

25. The system shall ensure secure authentication, data privacy, and reliable performance.
